ABOUT ME

I am a seasoned UX Designer with 12 years of experience in the full stack of user-centered factors, including 7 years of integrating design systems and branding styles. With an excellent understanding of UX techniques and processes, I am dedicated to business analysis, user-centered design, and human-computer interaction, and have worked locally and internationally with experts from various fields. My focus is on creating and documenting exceptional user experiences that align with standards and designs. I have experience in different industries and application types, including Whitebrand applications, Headless CMS projects, mobile apps, and logistics apps.

TOOLS OF THE TRADE

PROFESSIONAL EXPERIENCE

2023 — 2024

Lead Designer at EPAM, Baker Hughes

As lead designer, I was responsible for integrating three standalone tools into a comprehensive data-driven oil & gas software platform. Driving user-centered design throughout the process, I ensured a seamless user experience without stepping in to contribute to design execution alongside team members, ensuring project progress and consistent quality.

2022 — 2023

Lead Designer at EPAM, Hyatt

Led internalization of aftermarket tool, transforming it into a compliant, user-centered reporting solution through seamless design system integration.

2021 — 2022

Key Designer at EPAM, Ortho Clinical

Transformed research into actionable insights, empowering teams and clients through seamless knowledge flow and fostering collaboration. Propelled project momentum with informed decision-making.

EDUCATION

2007 — 2015

Universidad de Cartagena

Bachelor's degree - Systems Engineer, minor in Software Architecture and Project Management

CERTIFICATES

Adobe

Adobe Certified Associate in Visual Communication Using Adobe Photoshop CS6 - 97557db3-7d63-4541-a8c5-b29edffc99b4

LinkedIn

Coaching and Developing Employees

KEY SKILLS

Design Leader

DESIGN OPERATIONS

TEAM LEADERSHIP

TEAM MENTORING

TECHNICAL RECRUITING - FITTING - STAFFING

TECHNICAL KNOWLEDGE TRANSFERS

THE CHALLENGES

As leader, the biggest challenge is to achieve a good environment for the team to grow and perform accordingly to the client/business needs, that the team-client-project relationship stay clean and healthy, and moreover, the team members maintain their motivation and willing to perform as expected.

ACHIEVEMENTS

In different teams where I had the opportunity to lead, the achievable goals were always in terms of client's painpoints vs team effort, and I can say we always achieved cohesion, good technical performing and team happiness.

New projects.

Since i'm still fully attached to Cognos transition (in a slow roll right now) and the other projects as strategic/architect lead, the Proposed idea from me is that for **new projects**, you can count with **20 to 40%** of my time efforts to achieve one or many of these activities:

- Strategic role
- UX delivery role
- Product design role
- Interviews
- Fit interviews
- Product vision (like RFP + MOD joining)

ACTIVITIES AND ROLE

Led the successful internalization and user-centric transformation of an aftermarket tool into a compliant reporting solution with seamless design system integration. For Envision Reporting, I prioritized optimal user experiences through a collaborative approach focused on co-design sessions (70%). Simultaneously, I provided strategic guidance and direction for other projects like Meetings on Demand, ensuring timely milestones and exceeding user expectations. My leadership style emphasizes fostering a positive and productive team environment while delivering results across UX, product design, and strategic initiatives.

Projects of Interest

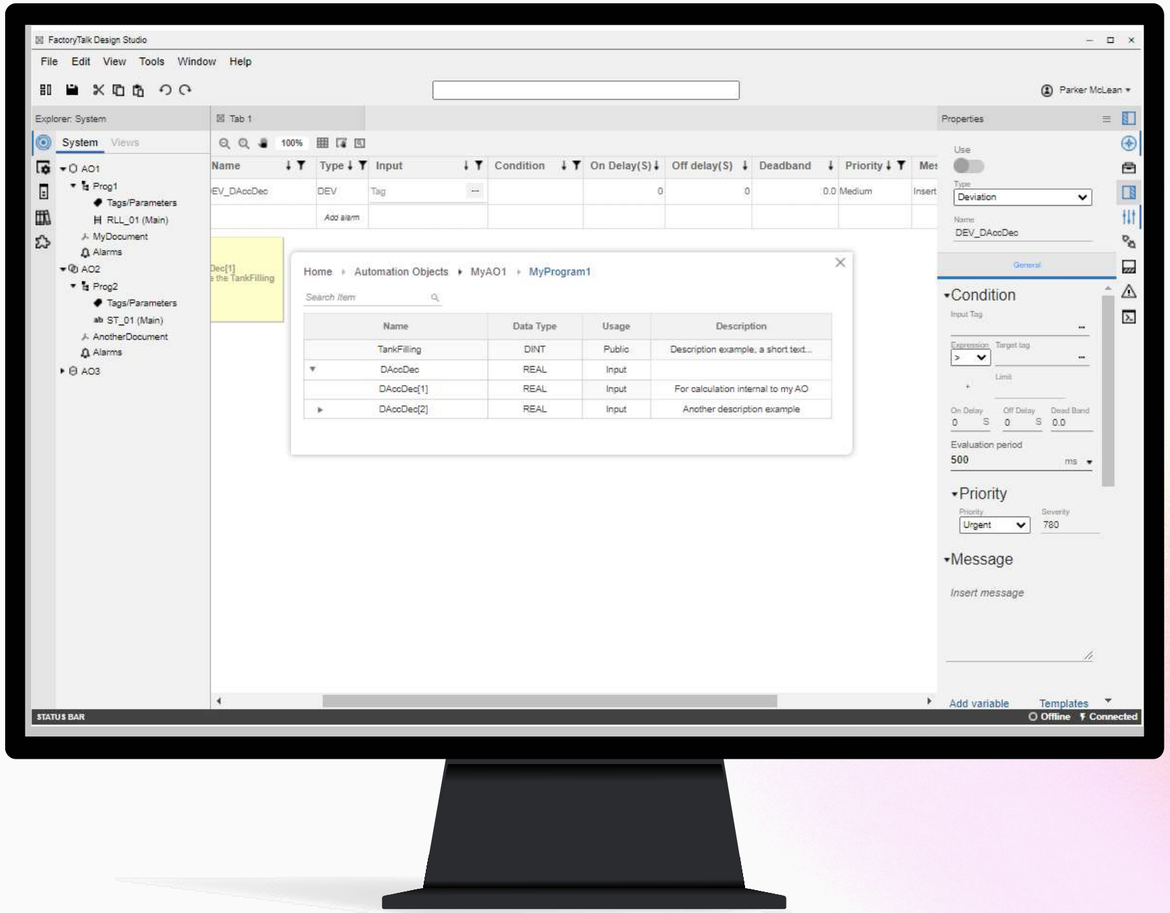
Industrial Desktop Software

Full stack UX Designer

DESKTOP APPLICATION SERVING TO AUTOMATION

REVOLUTION TO ONE OF THE USA BIGGEST AUTOMATION

AND AUTOMOTIVE COMPANY



THE PROBLEM/DESIGN ASPECT

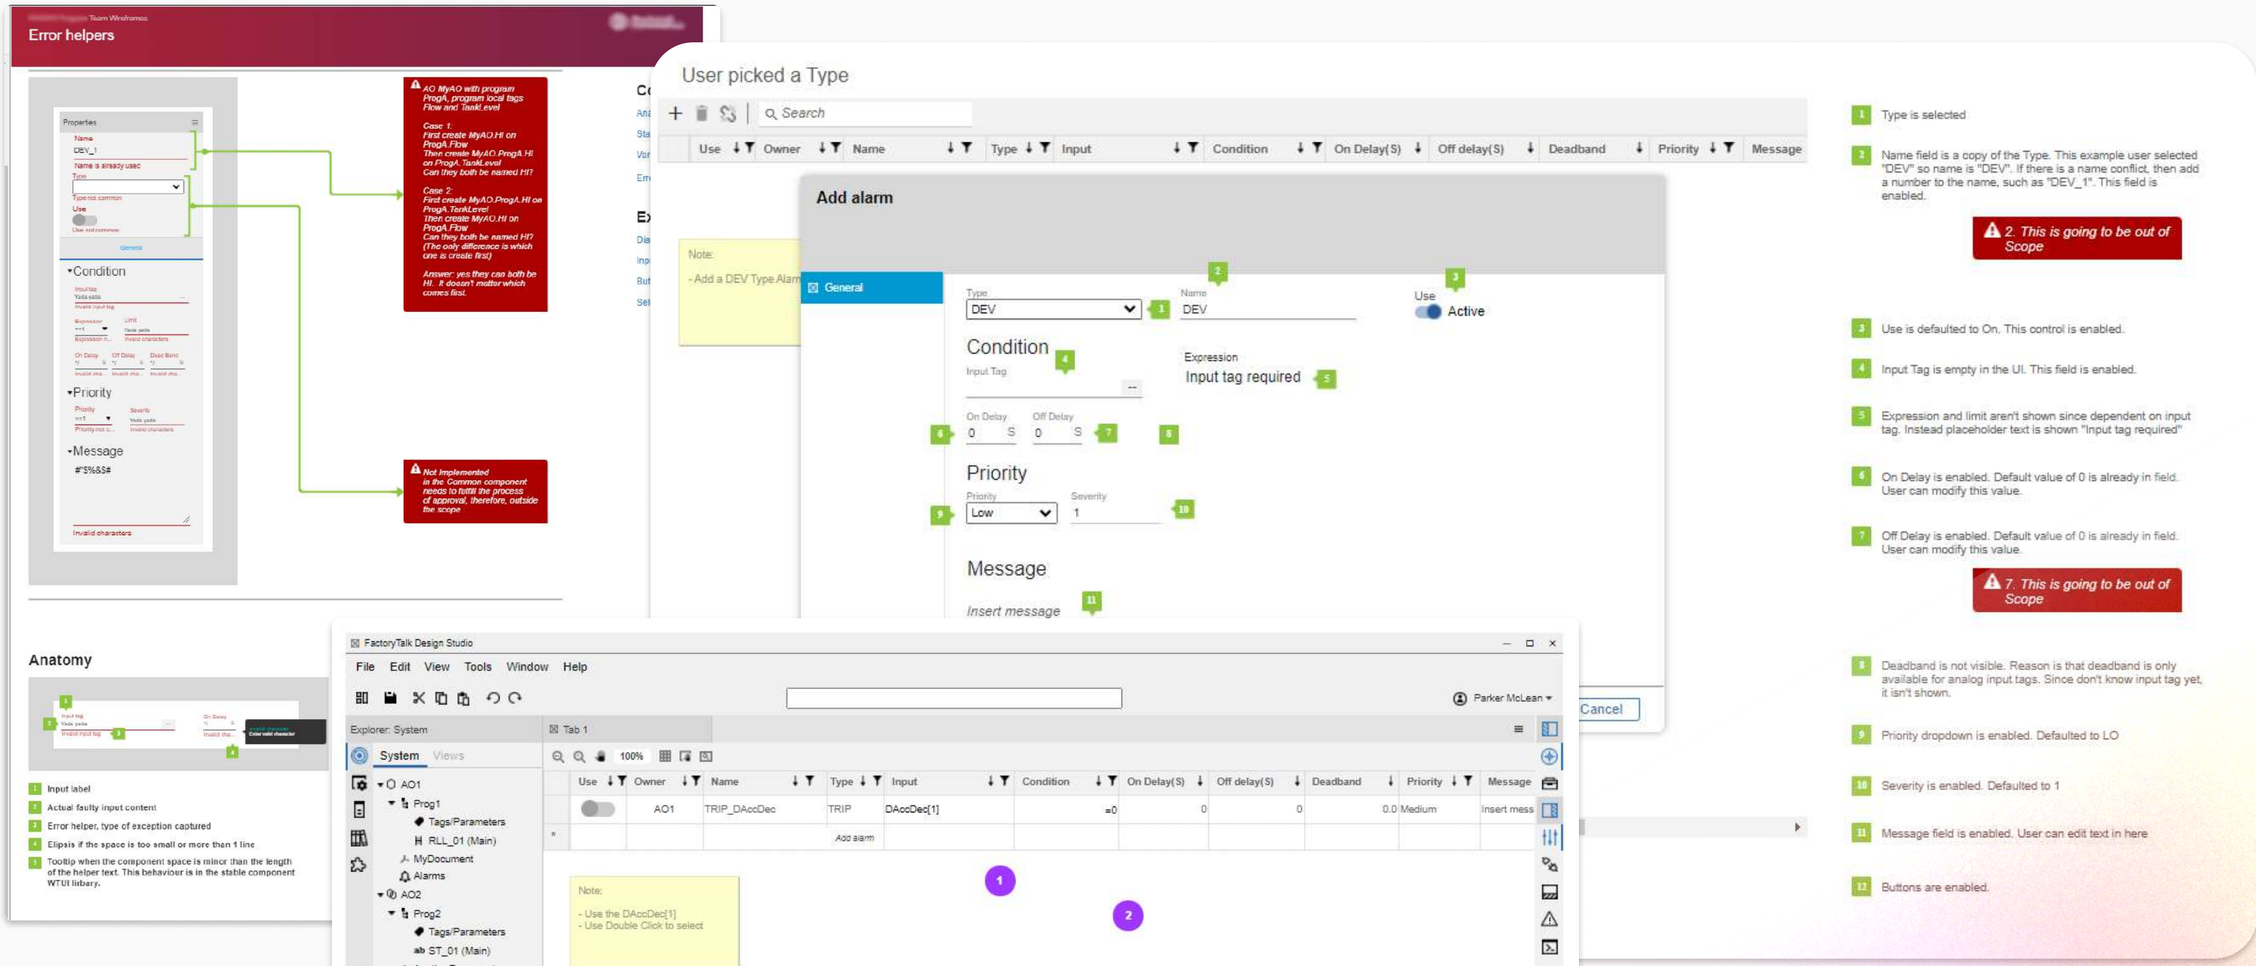
Thus being one of the biggest companies for automation, their sofwtware aspect was divided and oudated in 3 different applications, the main goal or problem to solve, was to integrate the key functionalities of those 3 apps, into one bigger, robust and 'operator' friendly desktop application.

ACHIEVEMENTS

Beign part of 20+ groups team, was a challenge, but fortunately managed to get them all together in agreement with decisions regarding the safety aspect of this big application, using all my skills in this project.

USED SKILLS

- INFORMATION ARCHITECTURE
- WIREFRAMING
- ACCESSIBILITY AAA
- USER FLOWS
- USER RESEARCH
- UX DESIGN



ACTIVITIES AND ROLE

One of the main duties in the project was to document all the tiny details regarding the safety feature i was in charge. My role here was to develop, maintain and present such documentation from its foundation to the handoff to devs.

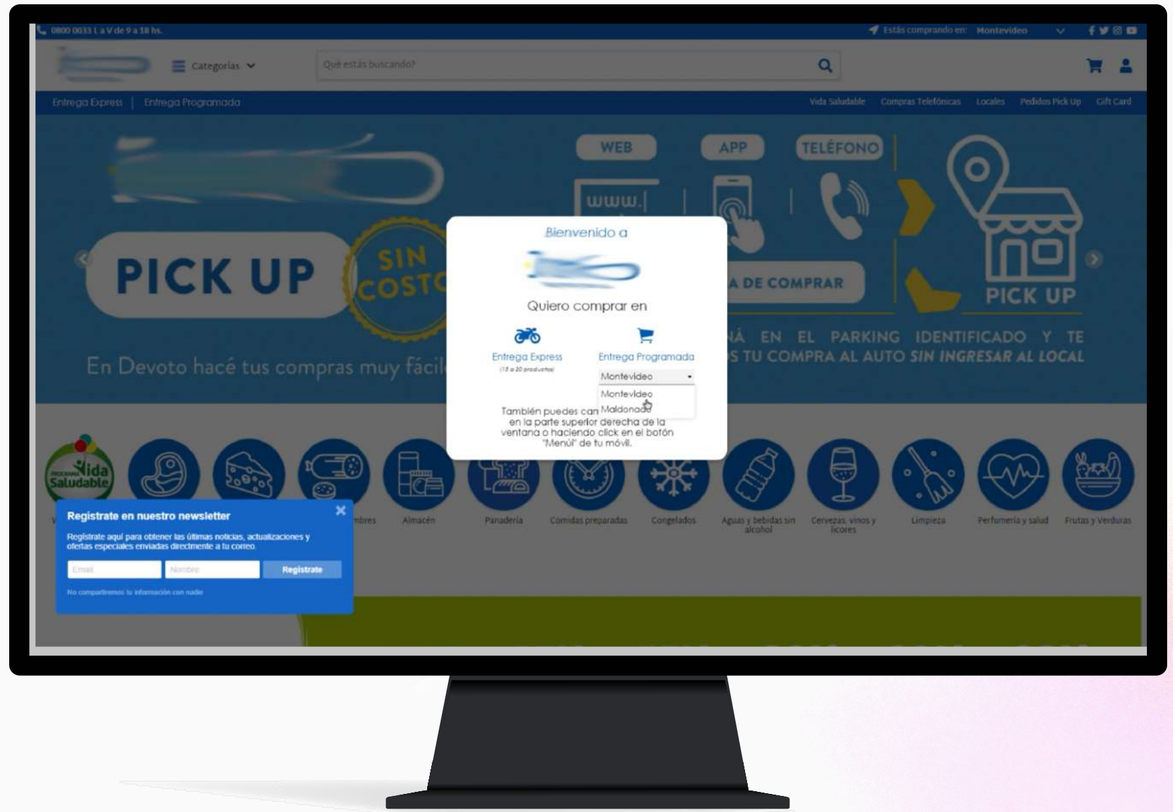
Discovery process for a Retailer

Product/UX Researcher

THE IMPROVING OF VARIOUS CHANNELS AND FRONTS

FOR A BIG-AREA RETAILER IN URUGUAY



THE PROBLEM/DESIGN ASPECT

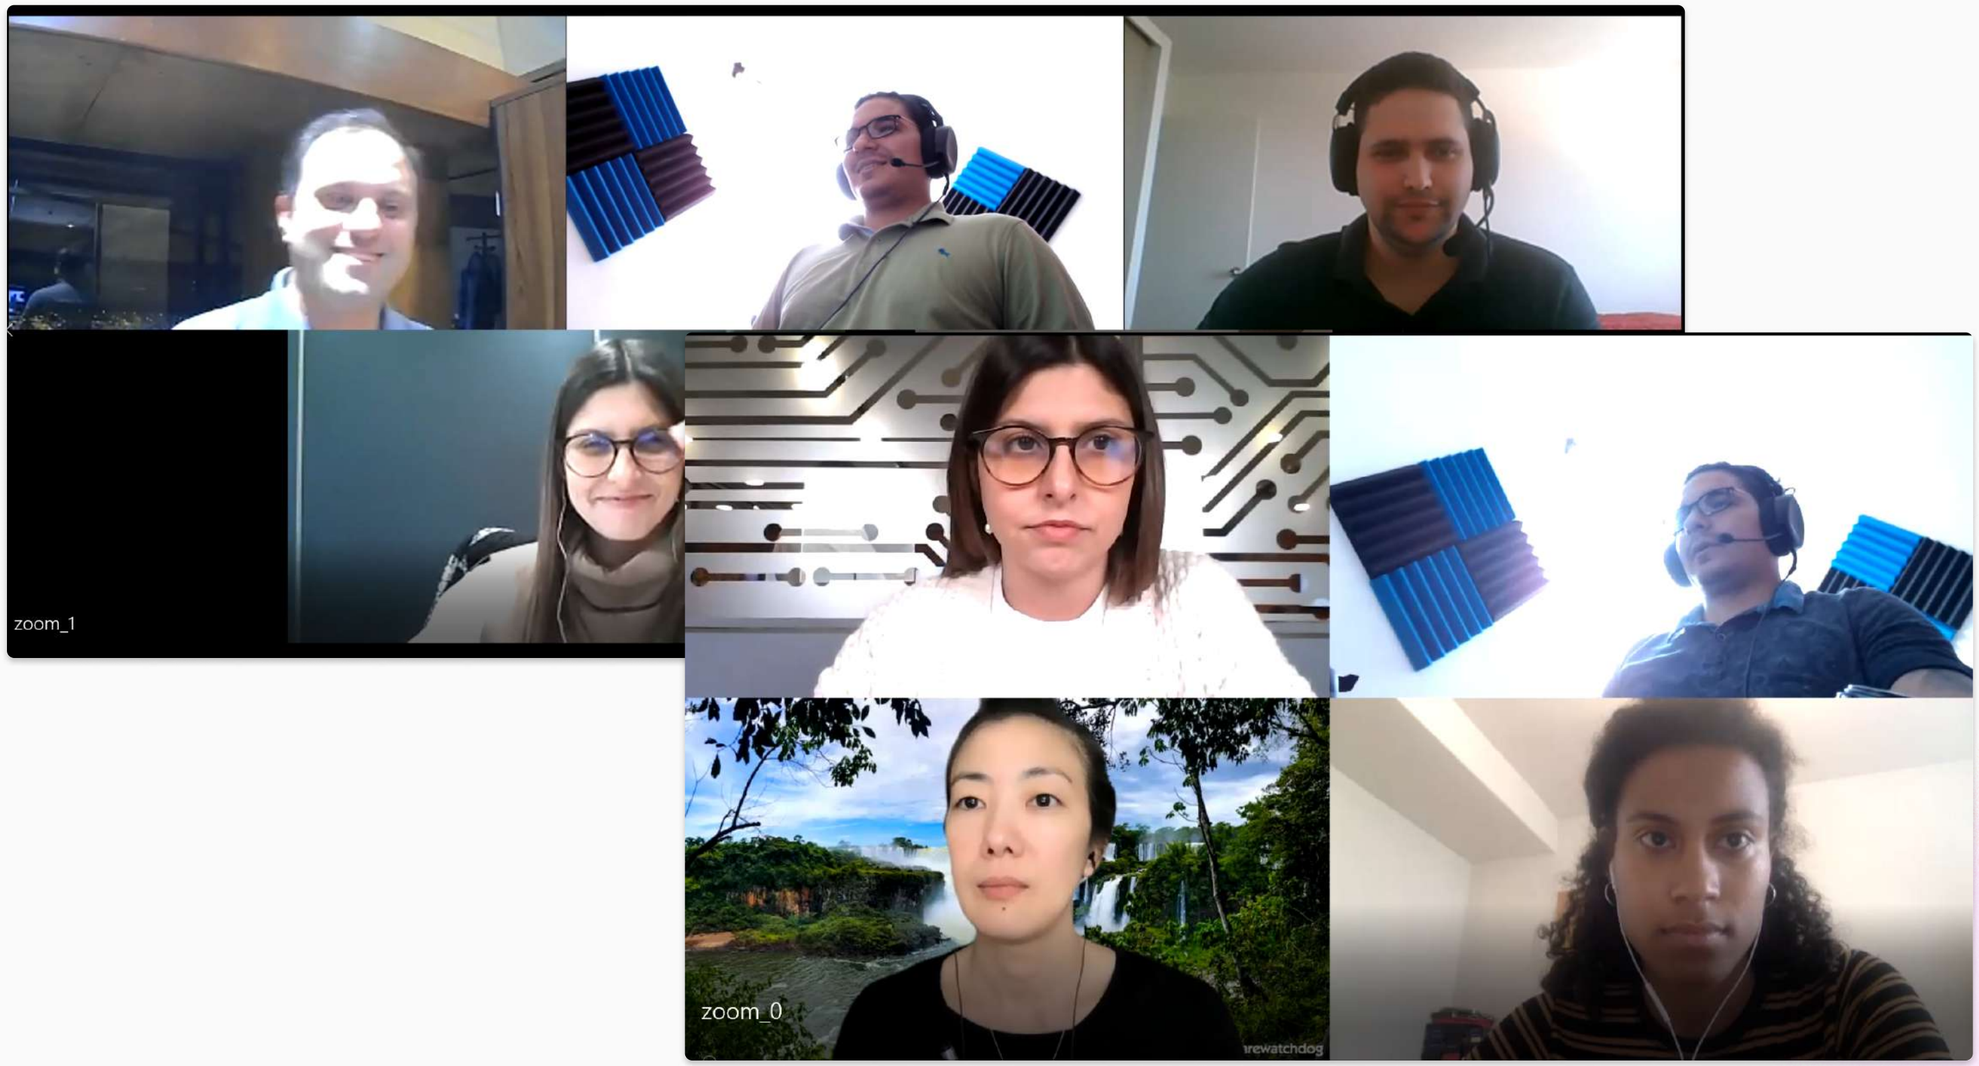
This Retailer, was struggling to improve basics aspects such as delivery time, and attention-to-go metrics, and some backend issues regarding the stock management. The bigest challenge was to get all the inputs and stakeholder in agreement, so the issue could be solved from the very business backend.

ACHIEVEMENTS

Recover and researched with enough users and diferent layer operators to, joined with other areas such as Bi and Ai, achieve a plan strong enough to face the client needs, not only ahieveing the time reduction planned, but even less.

USED SKILLS

BUSINESS MODEL MAPPING · SERV. BLUEPRINTS · USER FLOWS · USER RESEARCH · UX/UI DESIGN



ACTIVITIES AND ROLE

The main activity of my role was to research and help the service designer to get the right product track in where all the business goals and user pain points were aligned in such way, that we could design a better flow for them.

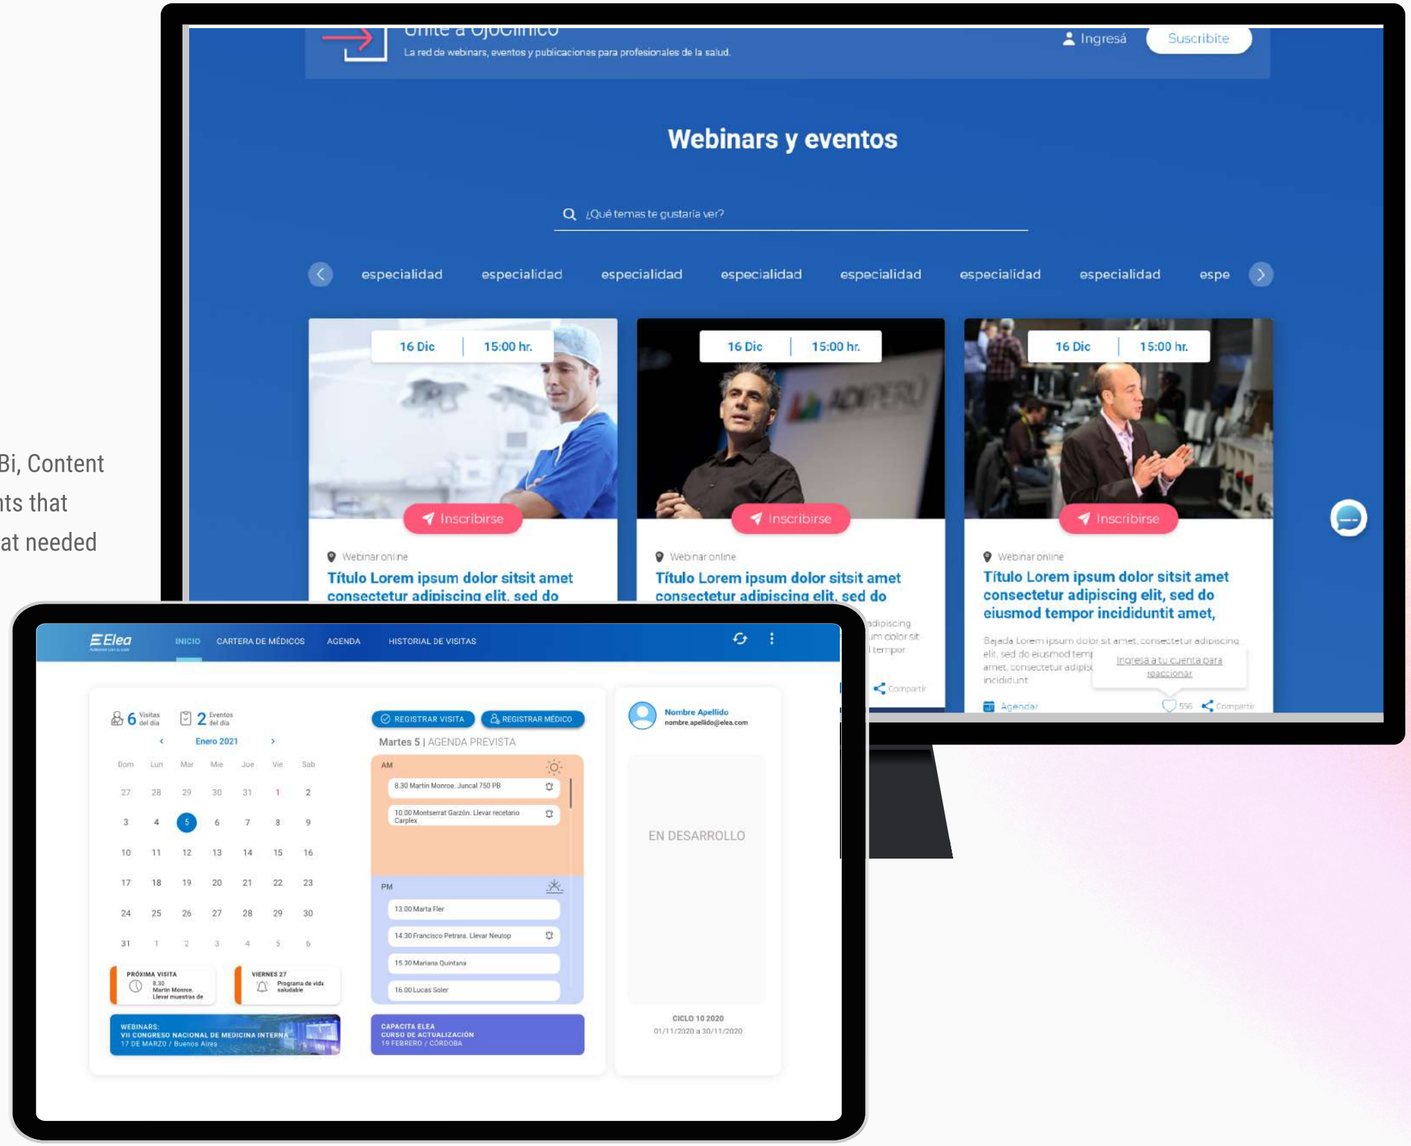
Pharma Company digital leap

Account Design Leader

THE DIGITALIZATION OF VARIOUS CHANNELS AND

FRONTS FOR A PHARMACEUTICAL COMPANY



THE PROBLEM/DESIGN ASPECT

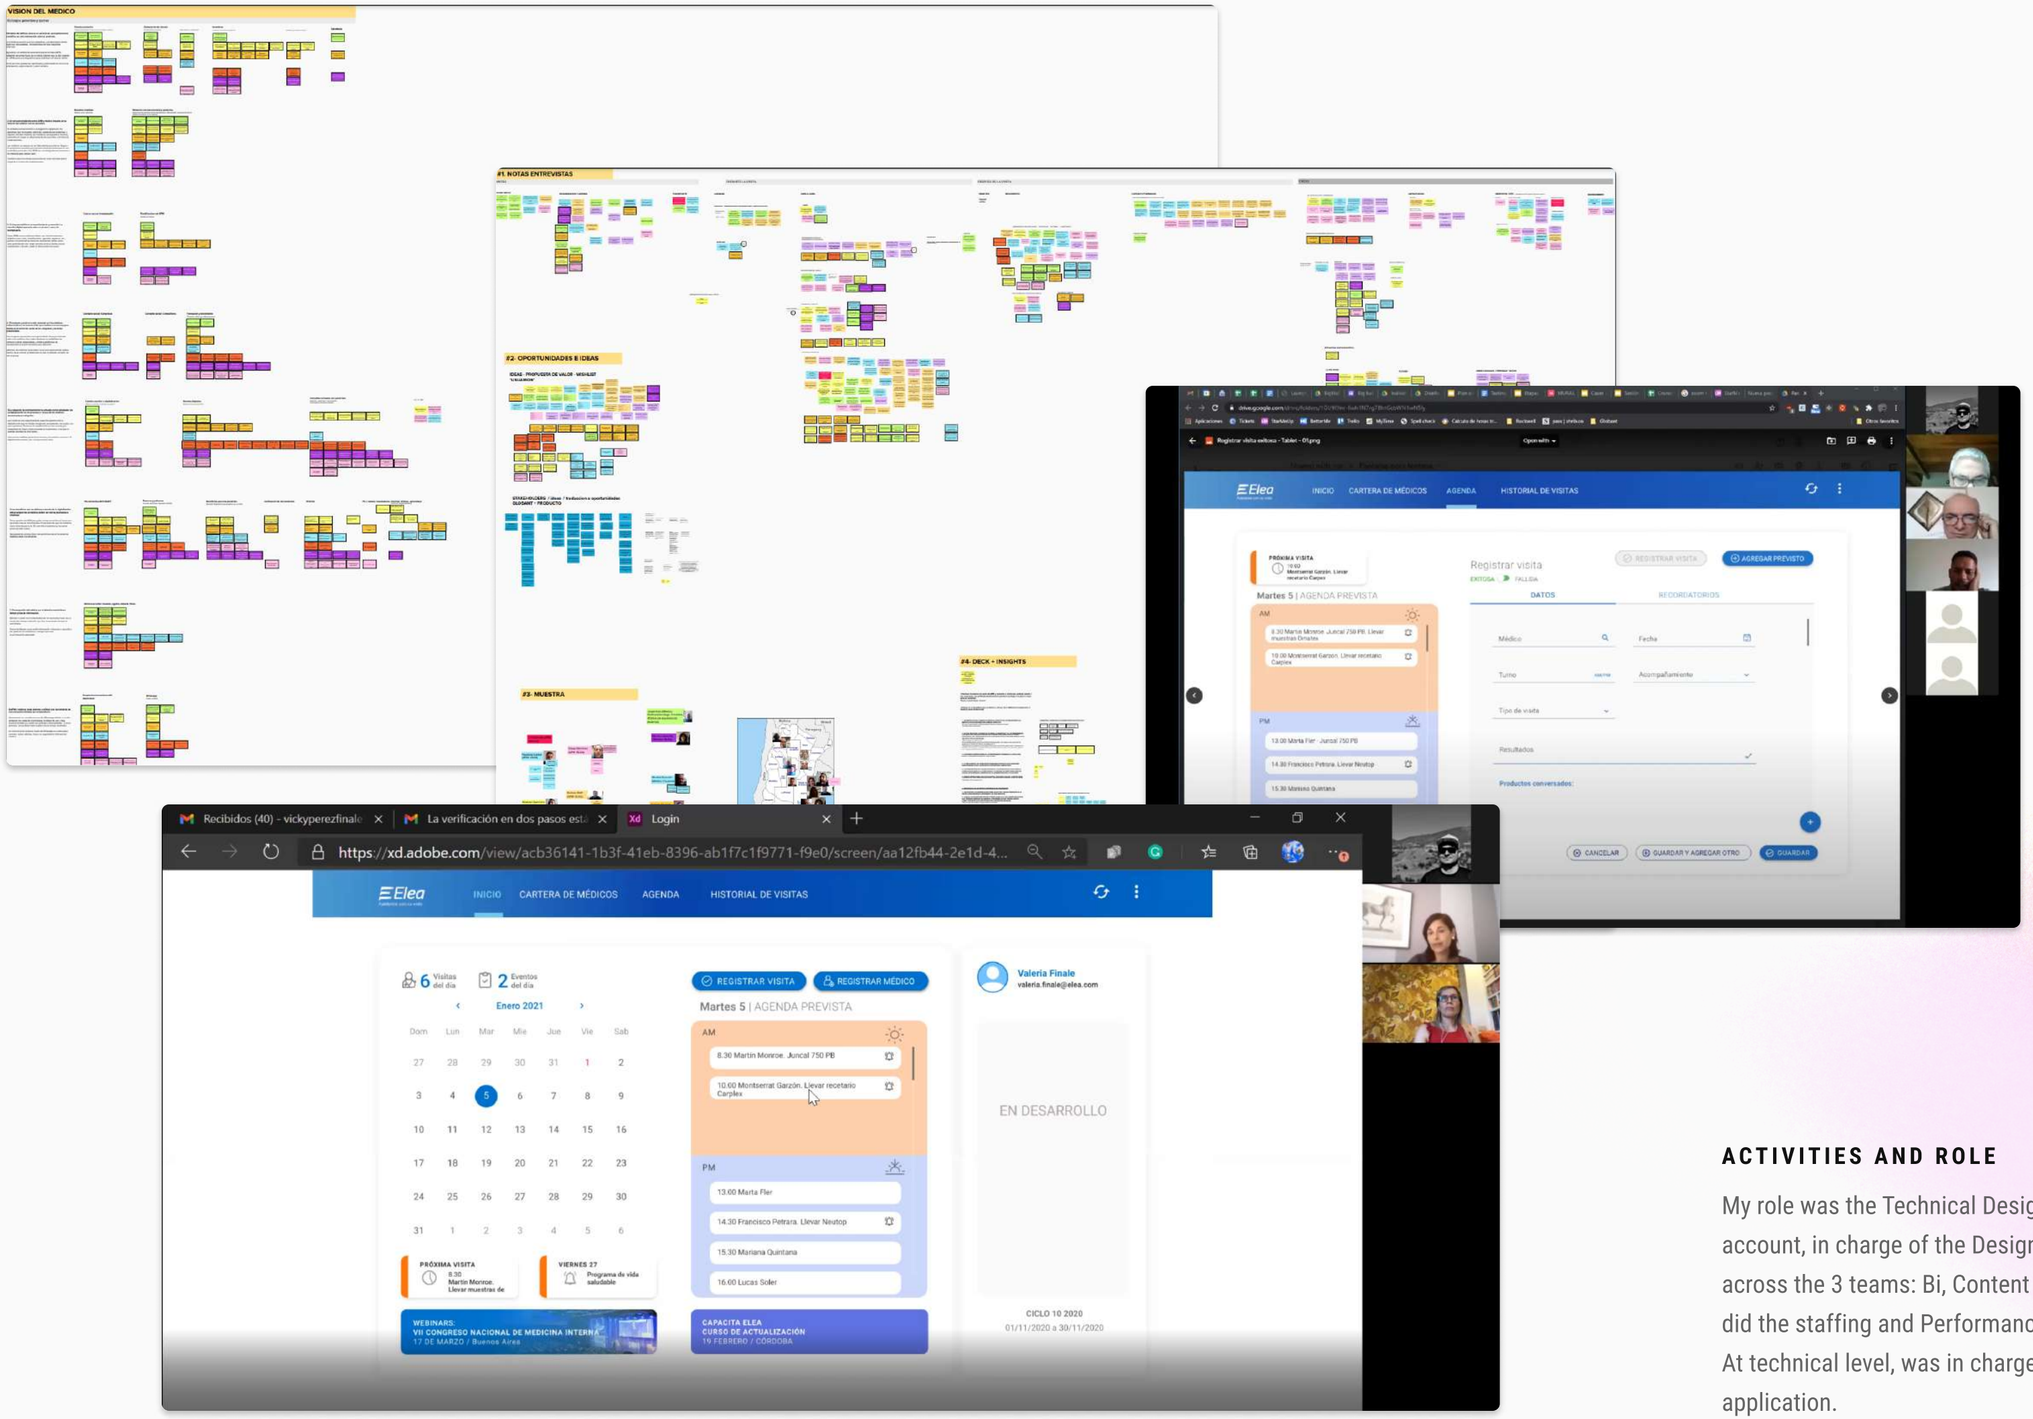
The company wanted to jump formaly into digital, has 3 main fronts: Bi, Content Hub and a Workforce native application. 3 totaly different environments that needed to be cohesive and synced with all the demanding features that needed to be covered.

ACHIEVEMENTS

Taking the client-team relationship to a great communication level, and sold the process-over-perception principle, achieving not only the client goals, but also a great team building and syincing according to the projects objetives.

USED SKILLS

- INFORMATION ARCHITECTURE
- WIREFRAMING
- USER FLOWS
- USER RESEARCH
- UX DESIGN



ACTIVITIES AND ROLE

My role was the Technical Design Leader for the whole account, in charge of the Design OPS and Team Leadership, across the 3 teams: Bi, Content Hub and Application. Also did the staffing and Performance evaluations for the team. At technical level, was in charge of the UX for the native application.

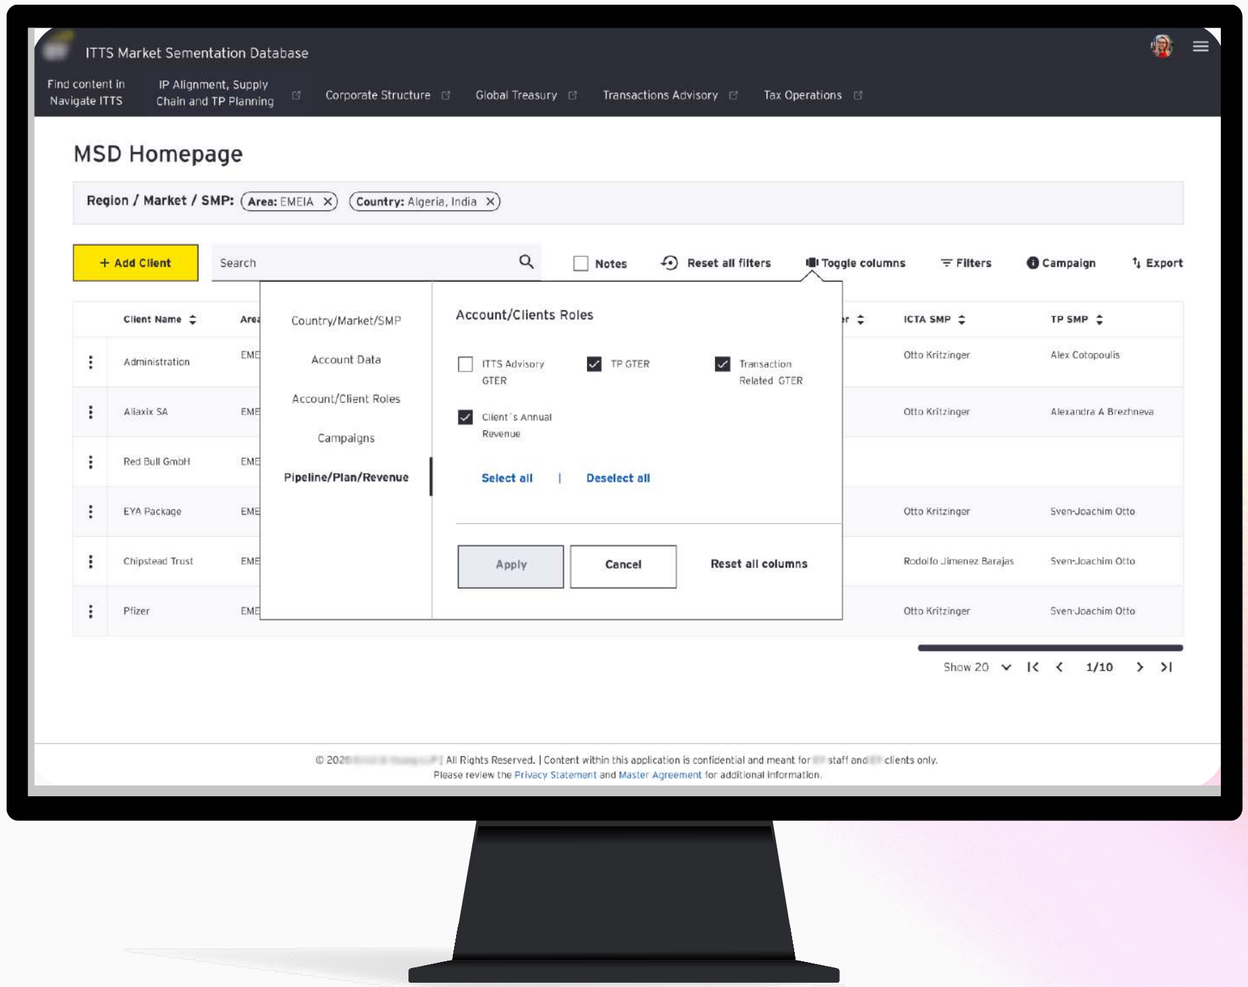
Taxative and Legal company

Product Designer

THE BUILDING OF AN INTERNAL SYSTEM TO SEGMENTATE

TARGET AUDIENCES



THE PROBLEM/DESIGN ASPECT

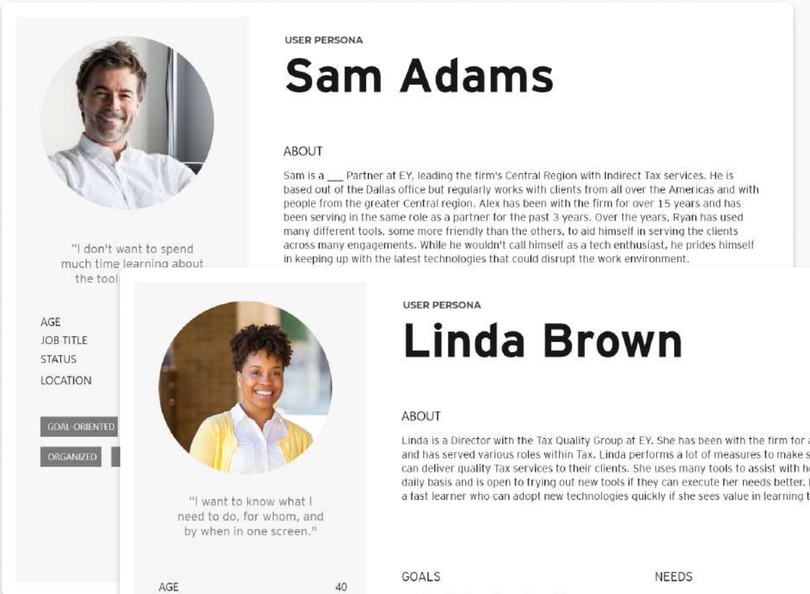
The company has a lot of different channels to get clients and go-to-buy funnels with a bigger amount of different filters put in place to segmentate those, the issue is that there is not a single platform to do so, therefore, the creation of one data-centric web platform to do this segementation

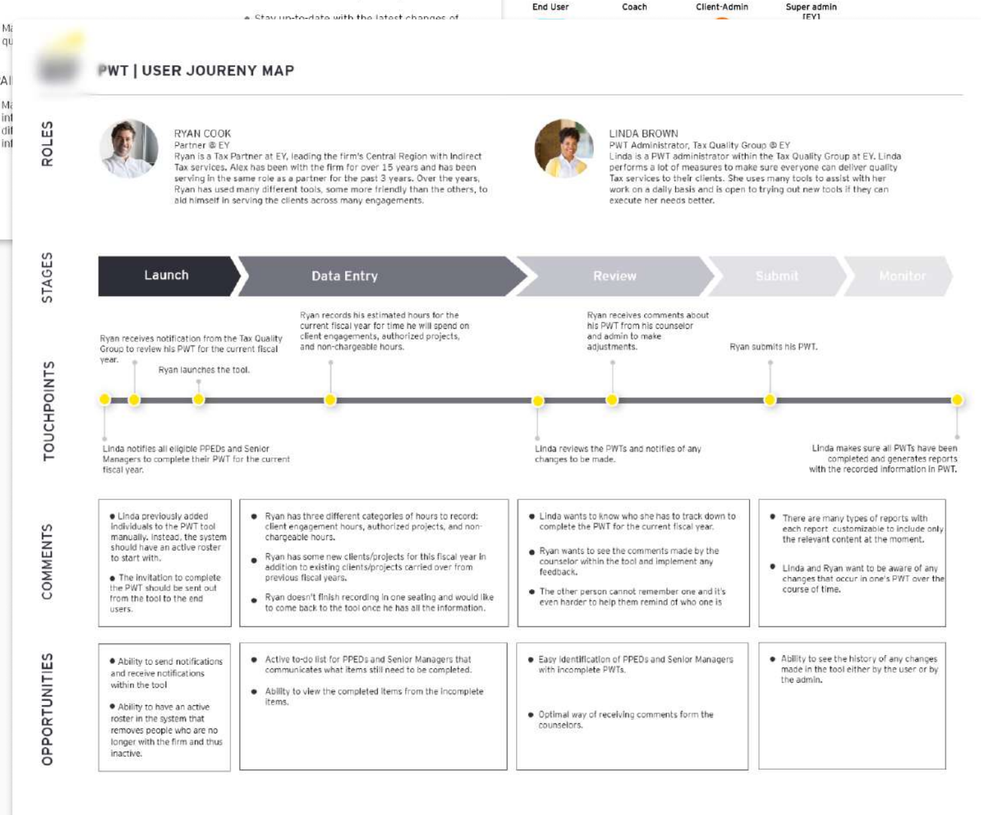
ACHIEVEMENTS

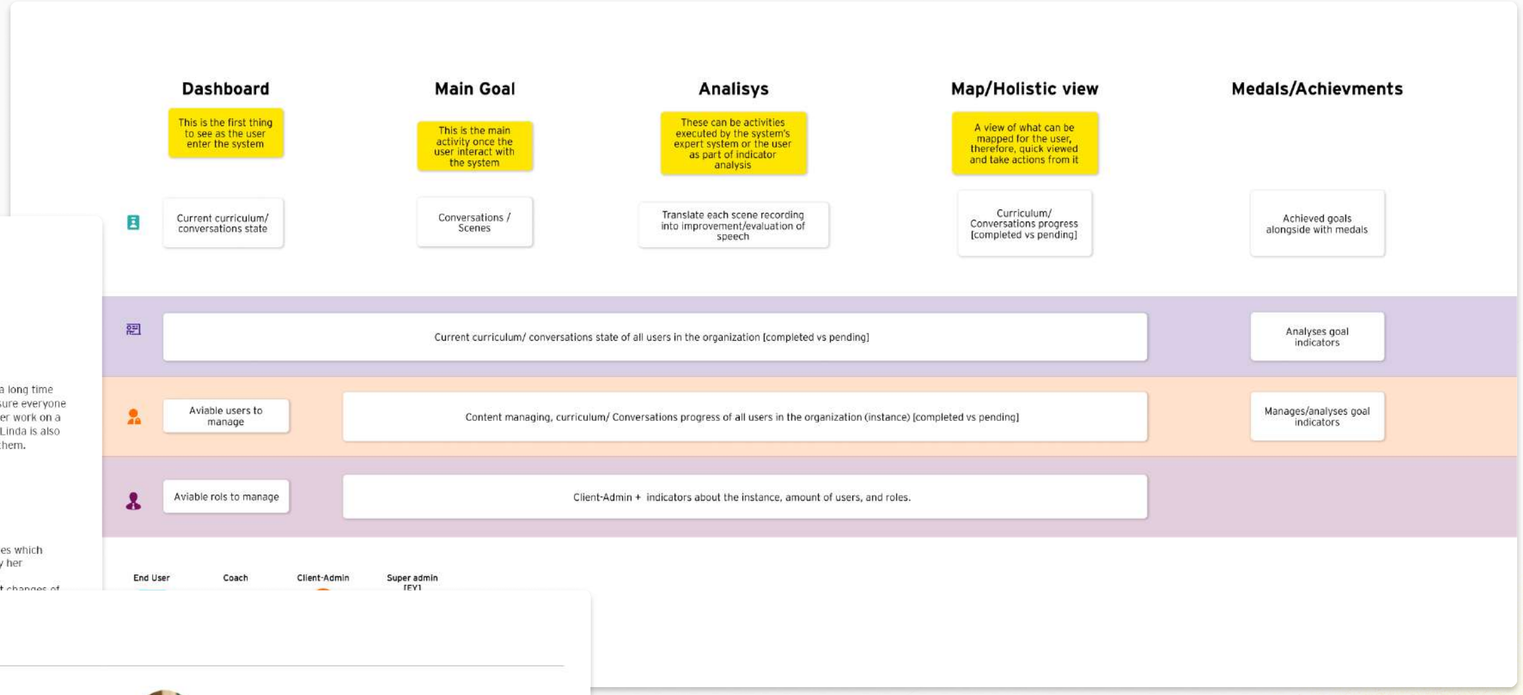
The project got ongoing forward achiving this segmentation and the 10 go-to-prod of the different versions I got to participate in, were fulfilling for the client, since allow them to make inbound marketing as an MVP-driven platform.

USED SKILLS

INFORMATION ARCHITECTURE | WIREFRAMING | ACCESSIBILITY AA | USER FLOWS | USER RESEARCH | UX DESIGN







ACTIVITIES AND ROLE

As product designer, the main activity was to land the client's cloudly needs into concrete tasks and requirements, then translate those into mockups with the help of a well thought and sorted design system that at given times, I helped to extend.

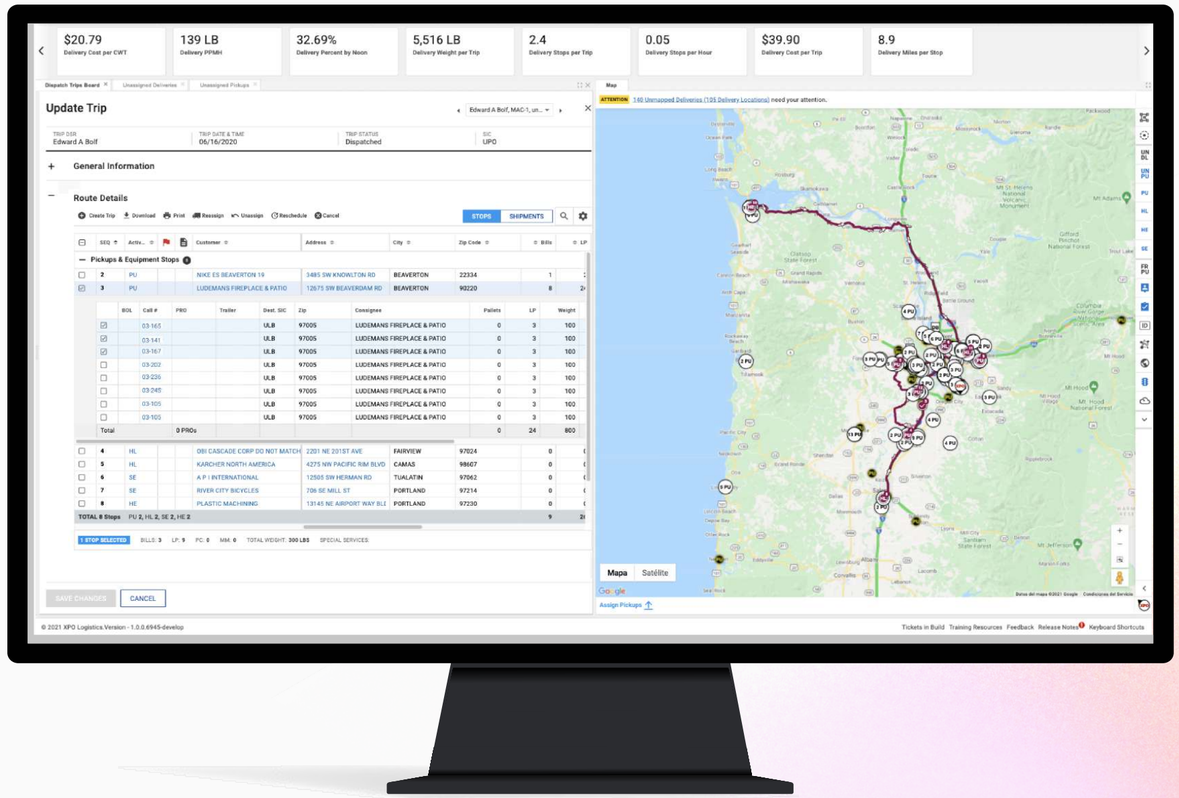
Logisitcs Last mile application integration

Product Designer

THE EXTENSION AND BUILDING OF A DATA-DENSE LOGISITCS LAST MILE APPLICATION TO ENSURE THE ZERO SOURCE OF TRUTH REGARDING SHIPMENTS HANDLING.



THE PROBLEM/DESIGN ASPECT

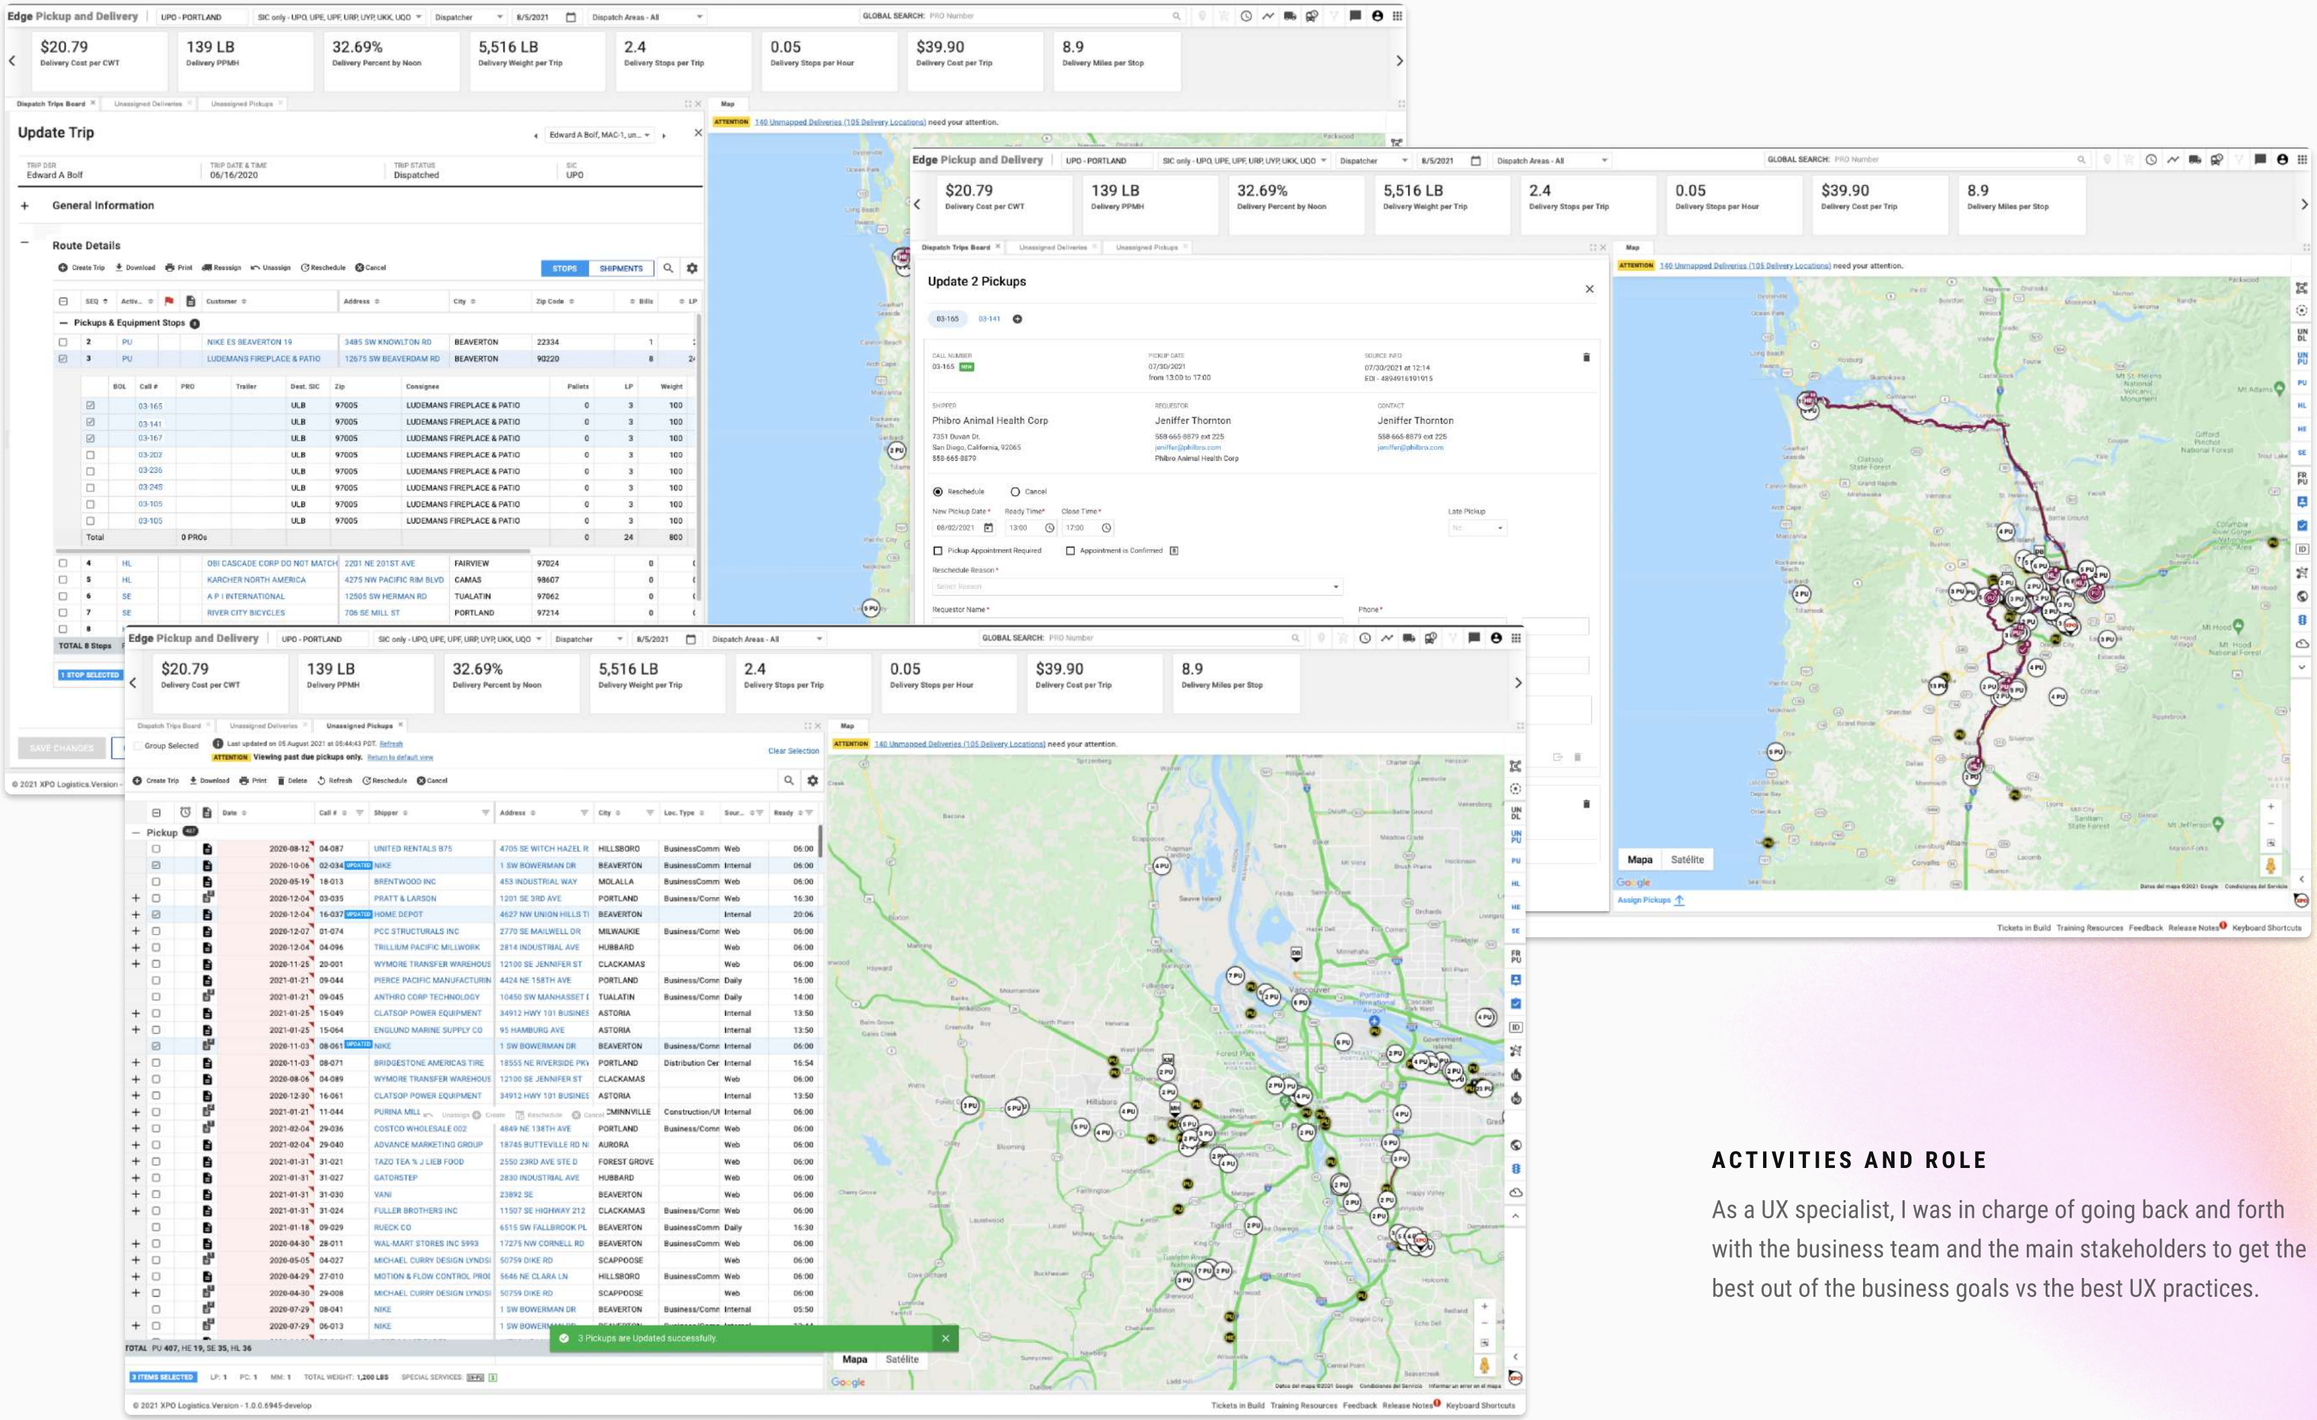
The amount of data makes really difficult for the two profiles involved in the operation of this logisic last mile business, therefore, the biggest challenge was to put together a greatly dense application, with the modern and top of the line web features that could come in between.

ACHIEVEMENTS

In the time working in the project, we managed to inegrate bulk actions that helped the plataform to update or reschedule a big amount of shipments at the same time.

USED SKILLS

- INFORMATION ARCHITECTURE
- WIREFRAMING
- USER FLOWS
- USER RESEARCH
- UX DESIGN



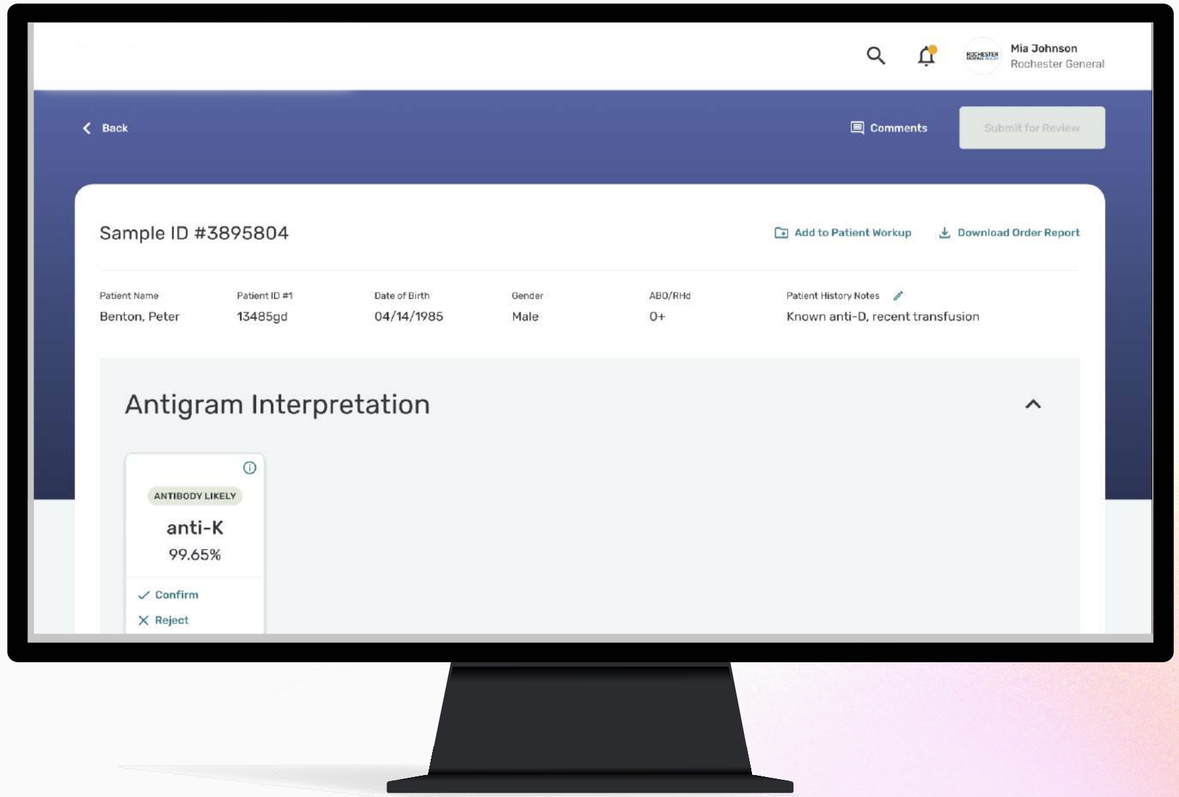
ACTIVITIES AND ROLE

As a UX specialist, I was in charge of going back and forth with the business team and the main stakeholders to get the best out of the business goals vs the best UX practices.

Antibody Identification Assitant platform

UX Product Strategist

THE CONSTRUCTION OF AN ANTIBODY IDENTIFICATION PLATFORM, HELPING TROUGH THE MVP CREATION PROCESS, GOING FROM THE STRATEGY UNTIL THE INFORMATION ARCHITECTURE AND BACKLOG.



THE PROBLEM/DESIGN ASPECT

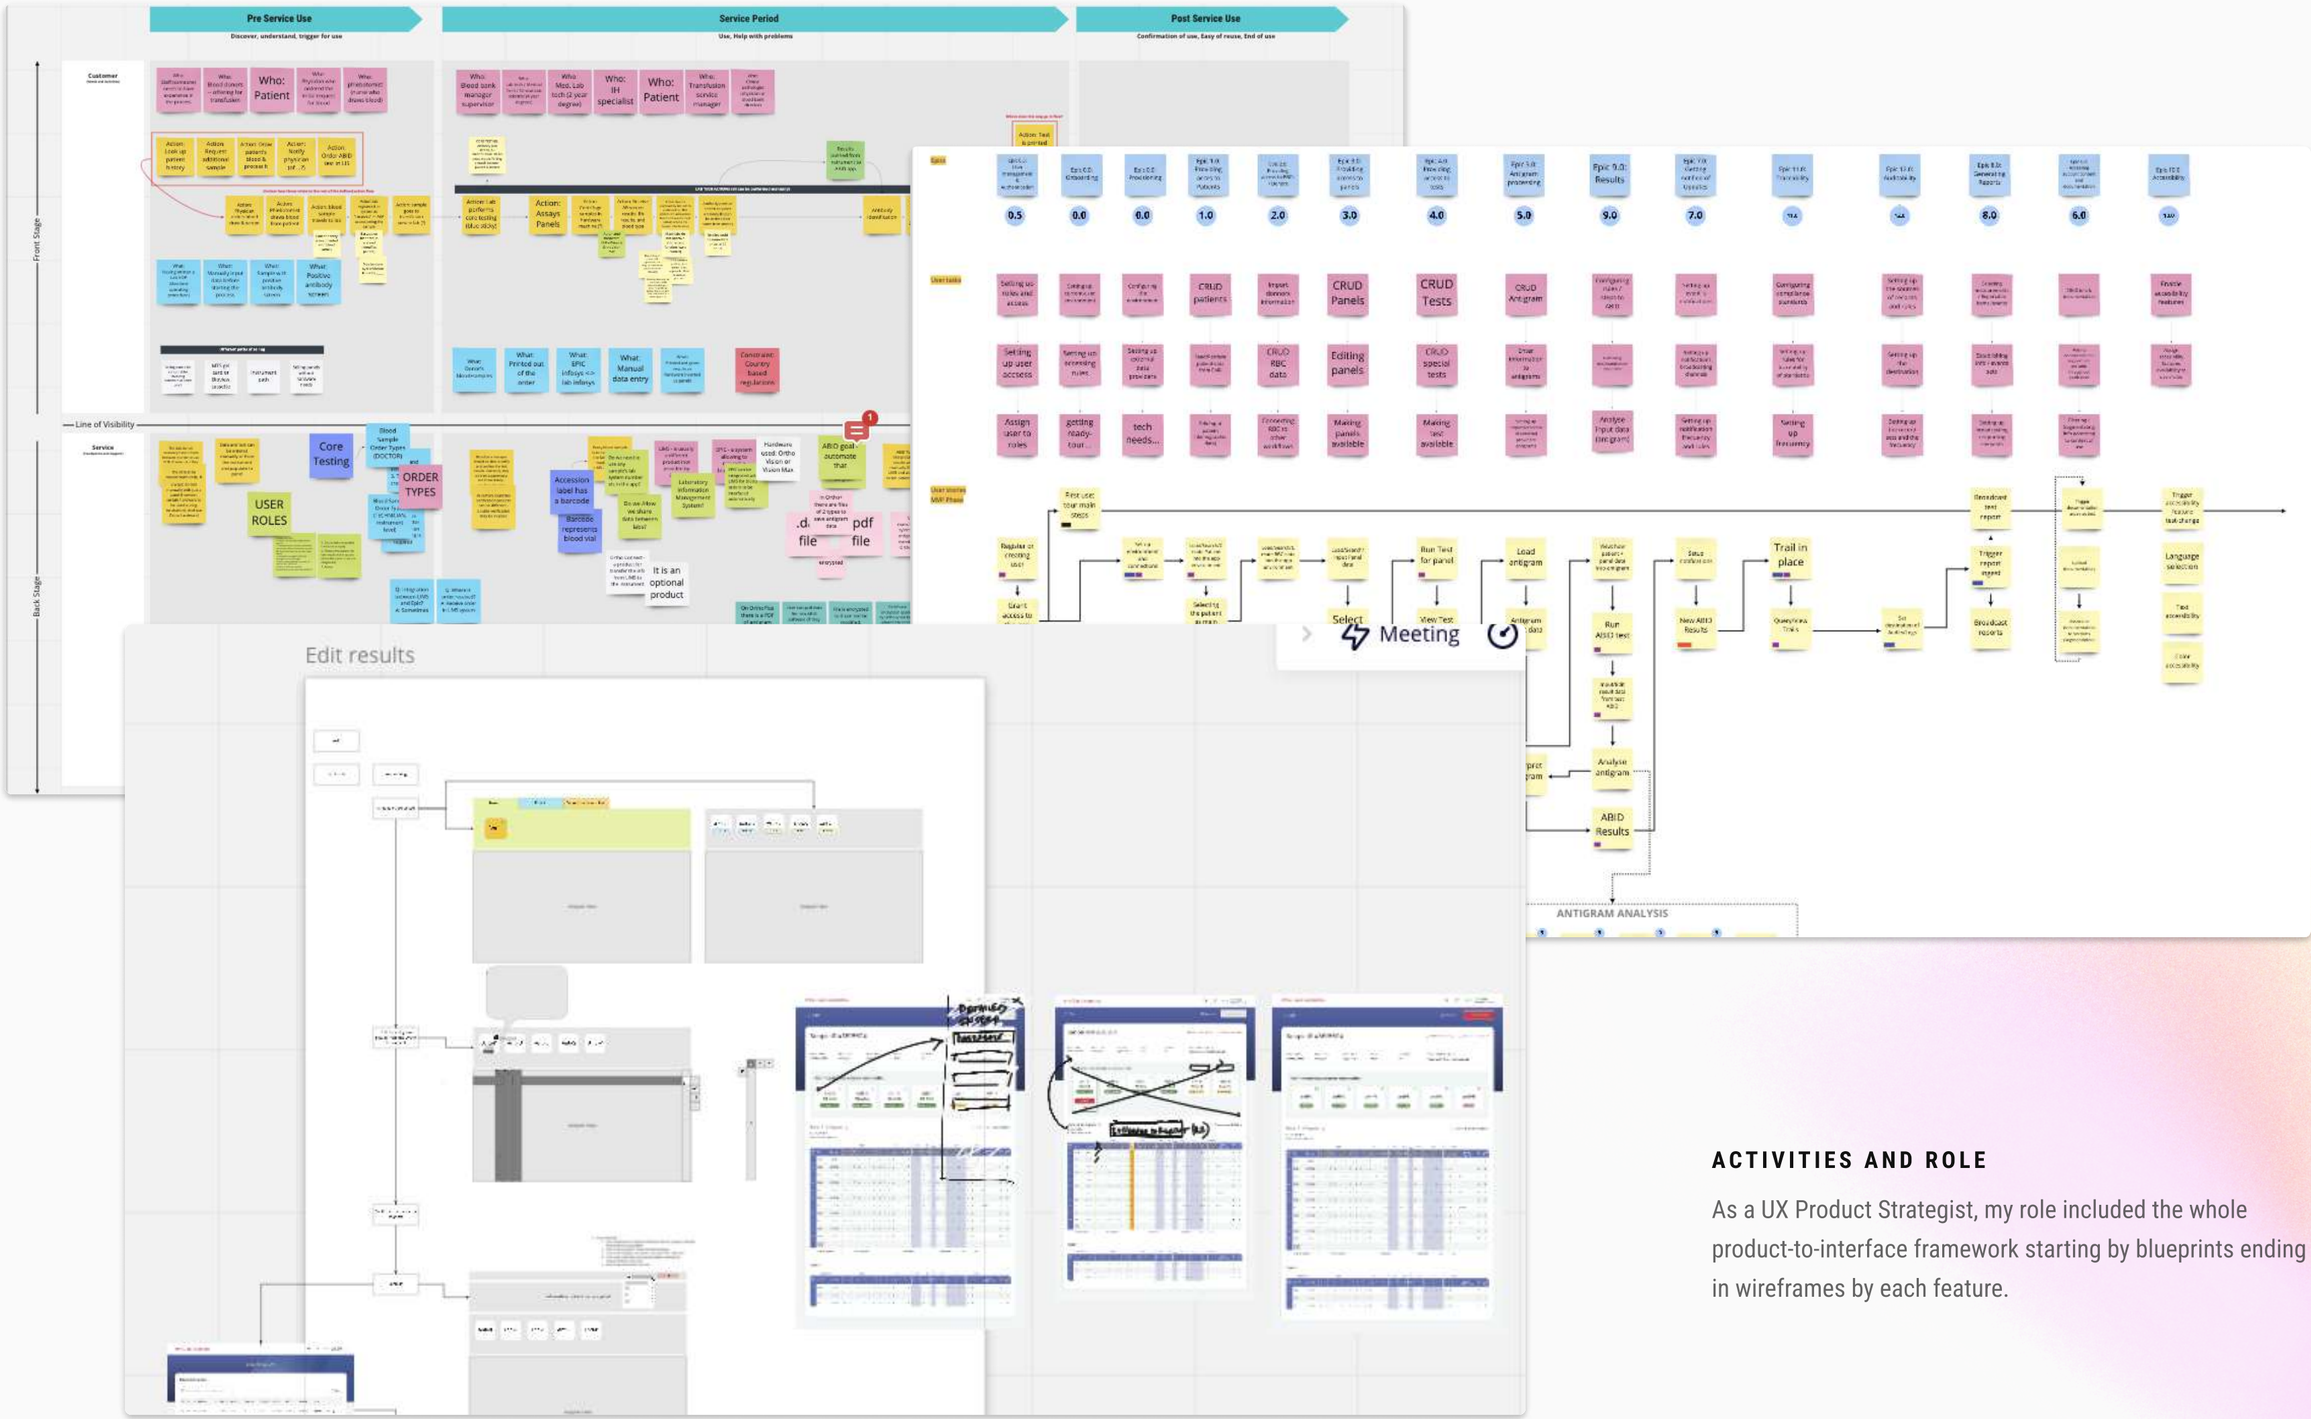
The ABID process is quite meticulous, therefore, an error could lead into someone beign transfused with the wrong blood, even if it's the same RH Type. A need for a software that helps managing and assisting the identification phase is a must. That's the main goal for the platform (even in MVP stage).

ACHIEVEMENTS

During the MVP we discovered, improved and enhanced the proccess for ABID, and delivered a good plan and interesting clickable prototype for such needs, leaving the client happy and starting the actual construction of the platform.

USED SKILLS

- INFORMATION ARCHITECTURE
- WIREFRAMING
- USER FLOWS
- USER RESEARCH
- UX DESIGN
- UX STRATEGY



ACTIVITIES AND ROLE

As a UX Product Strategist, my role included the whole product-to-interface framework starting by blueprints ending in wireframes by each feature.

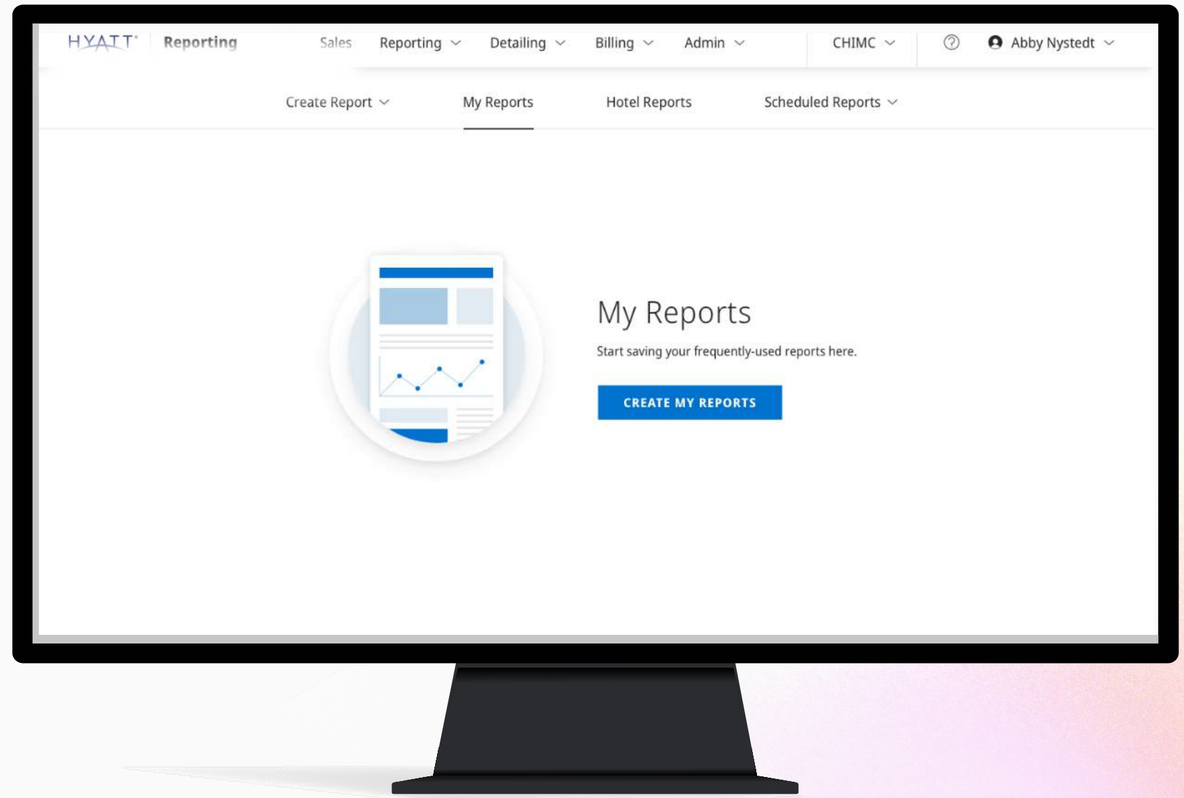
Reporting and Envisioning Internal tool for Hotel Chain

Key Designer and Lead

TRANSITIONING AN AFTERMARKET TOOL TO AN INTERNAL REPORTING TOOL, ENSURING COMPLIANCE WITH USER-CENTERED BEST PRACTICES AND INTEGRATING DESIGN SYSTEMS



THE PROBLEM/DESIGN ASPECT

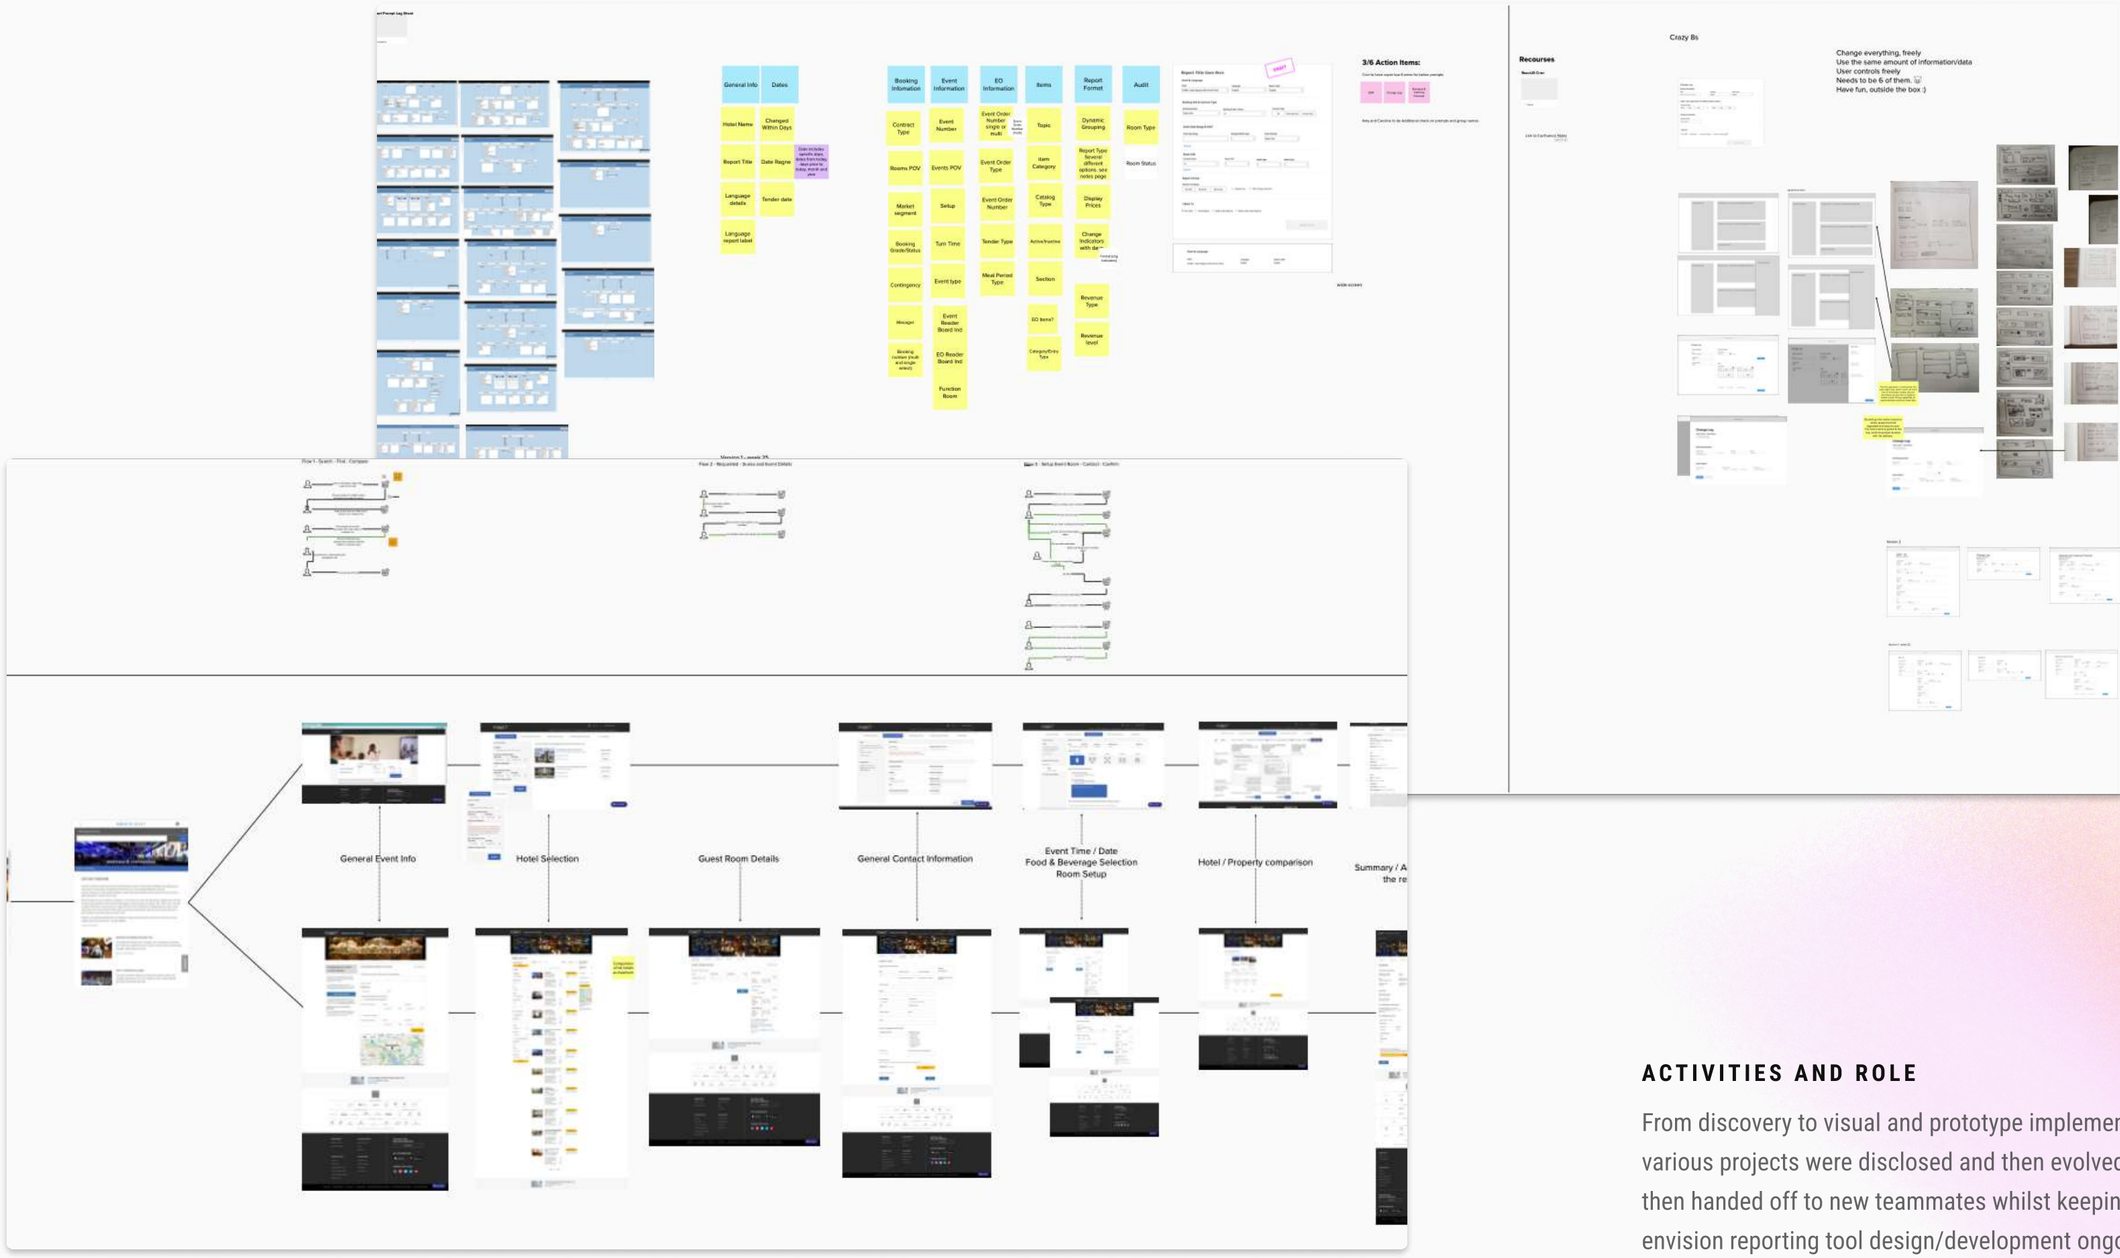
The Current aftermarket reporting tools, are besides clumsy and with messy ux, in a really old, non maintainable way, the need was to upgrade and update the whole workflow with a new app, completely inhouse

ACHIEVEMENTS

During my time as a key designer, I got to be seen as team lead, also led among other projects inside the account, the main reporting tool transformation, taking more EPAM people to the account to cover those projects as a good team expansion

USED SKILLS

- INFORMATION ARCHITECTURE
- WIREFRAMING
- ACCESSIBILITY A
- USER FLOWS
- DESIGN SYSTEMS
- UX DESIGN
- UX STRATEGY



ACTIVITIES AND ROLE

From discovery to visual and prototype implementation, various projects were disclosed and then evolved by me, then handed off to new teammates whilst keeping the envision reporting tool design/development ongoing.

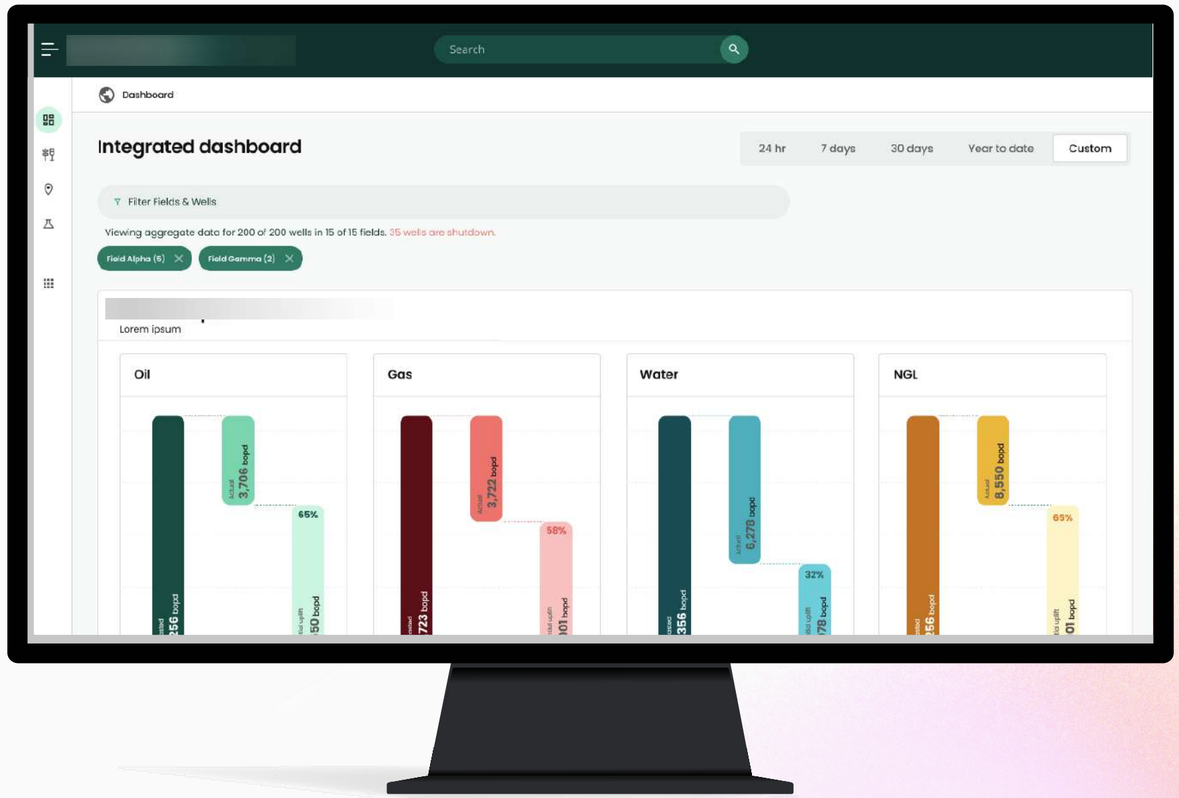
Transforming data management and visualization in the Oil & Gas sector to optimize industrial processes.

Key Designer and Lead

INTEGRATION OF SEVERAL AFTERMARKET TOOLS TO A ROBUST TOOL, ENSURING COMPLIANCE WITH USER-CENTERED BEST PRACTICES AND INTEGRATING DESIGN SYSTEMS EXISTING IN THE CLIENT SIDE



THE PROBLEM/DESIGN ASPECT

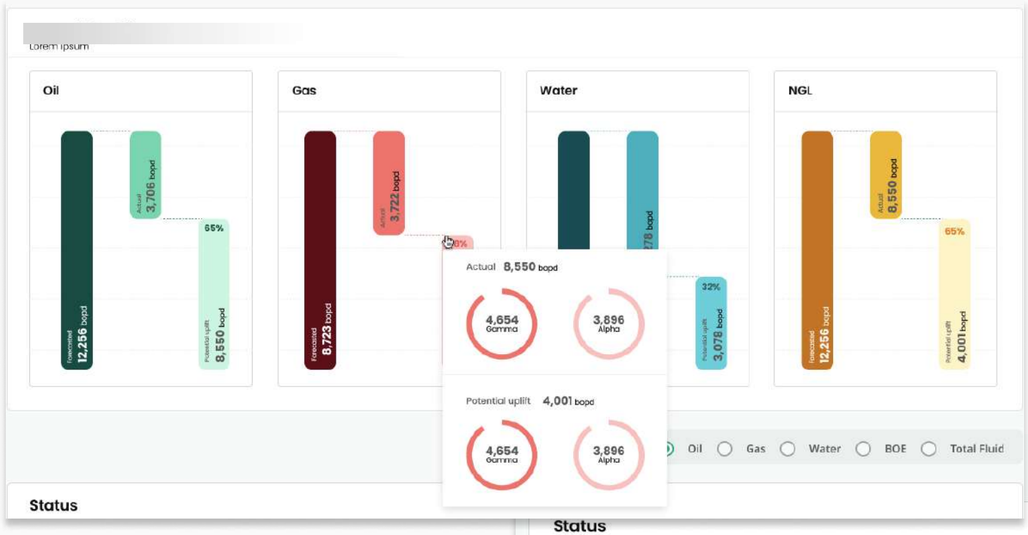
Effectively handle heavy data loads within industrial processes and interfaces, enabling efficient data ingestion, visualization, and actionable insights for key stakeholders.

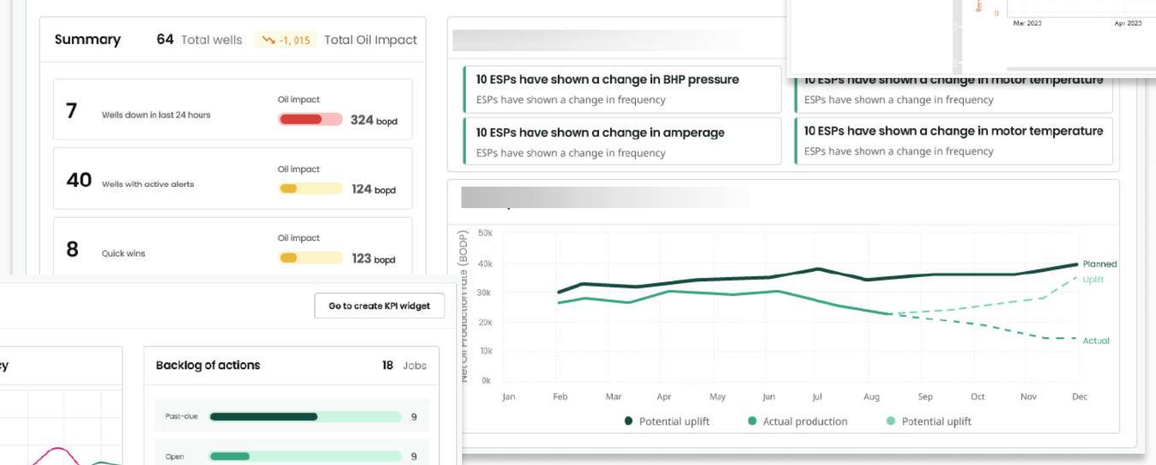
ACHIEVEMENTS

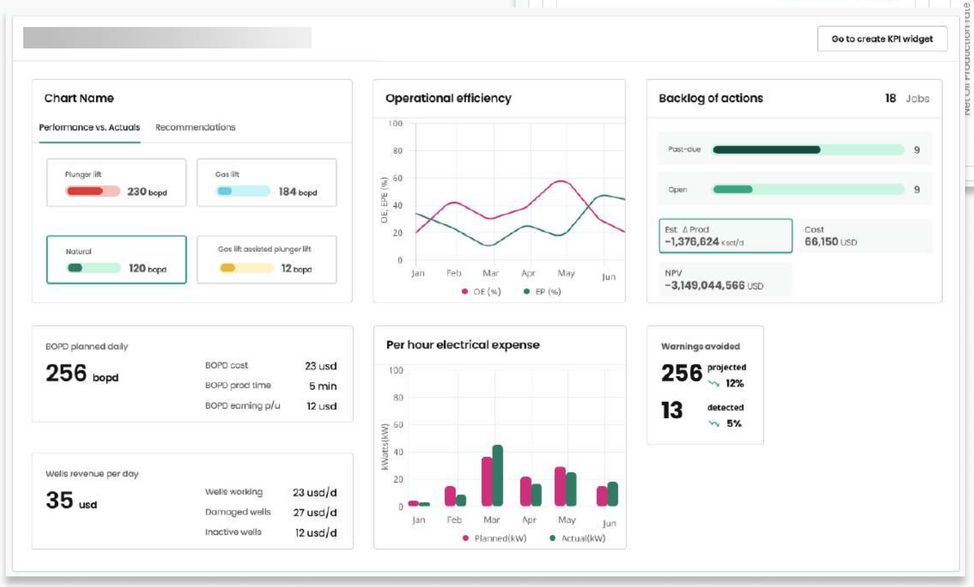
Boosted operational efficiency and user empowerment by: streamlining data workflows for faster insights, crafting intuitive visualizations that transform complex data into actionable guidance, prioritizing robust security, and championing user adoption through a data-driven design approach.

USED SKILLS

- DESIGN LEADERSHIP
- INFORMATION ARCHITECTURE
- WIREFRAMING
- USER FLOWS
- DESIGN SYSTEMS
- UX DESIGN
- UX STRATEGY







ACTIVITIES AND ROLE

Inherited a data visualization nightmare - overloaded widgets, cryptic charts. Led a data-driven UX overhaul, restructuring information architecture, simplifying data sets, and prioritizing cognitive ergonomics. Result? Soared user engagement and comprehension, fueling informed decisions and boosting operational efficiency.
